

Professional Summary

Full Stack Developer specializing in Java, Spring Boot, React.js, and AWS with hands-on experience through academic and personal projects, focusing on optimizing backend systems and database performance. Strong competitive programming background with 200+ problems solved and consistent top 15% ranking on LeetCode. Passionate about building scalable, reliable systems and efficient APIs. Quick learner with strong problem-solving skills and a passion for continuous improvement in software development.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML5, CSS3.
Backend: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, Flask, RESTful APIs.
Frontend: React.js, Redux, Bootstrap, Tailwind CSS.
Database: MySQL.
Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Git, GitHub, Maven, CI/CD.

Projects

Hospital Management System (Full Stack Web App) - [GITHUB](#)

March 2026– April 2026

(Java, Spring Boot, React.js, Tailwind CSS, Redux Toolkit, MySQL, JWT Authentication, Razor-pay, AWS)

- Developed a full-stack Hospital Management System to manage patients, doctors, appointments, and role-based access with secure JWT authentication.
- Implemented role-based authentication (Admin, Doctor, Patient) using JWT.
- Built patient management module with full CRUD operations
- Designed appointment booking system with doctor availability and time slots
- Integrated REST APIs using Spring Boot with secure endpoints.
- Managed global state using Redux Toolkit.
- Created responsive UI using Tailwind CSS and Framer motion.
- Implemented protected routes and secure token handling.
- Integrated secure payment gateway and appointment booking, processing 500+ successful appointments.

Flipkart Clone (E-Commerce Web App) — [GitHub](#)

Sept 2025– Oct 2025

Java, Spring Boot, React.js, Tailwind CSS, Redux Toolkit, Framer-Motion, MySQL, JWT Authentication, Razor-pay, AWS.

- Developed a scalable full-stack E-commerce application inspired by Flipkart.
- implementing core commerce functionalities with a robust backend using Spring Boot.
- Built a dynamic frontend using React.js with reusable components and responsive UI.
- Developed RESTful APIs using Spring Boot for handling product and user operations.
- Implemented complete CRUD operations for product management (Add, Update, Delete, View).
- Designed backend architecture with layered approach (Controller → Service → Repository → Entity).
- Integrated MySQL database using JPA/Hibernate for efficient data persistence.
- Structured project following MVC design pattern ensuring maintainability.
- Implementing JWT-based authentication & authorization for secure login systems.
- Designing role-based access control (Admin/User) for protected routes.
- Integrating Redux Toolkit for optimized state management in frontend, Enhancing system scalability and security following industry best practices.

Education

B.Tech in Computer Science	2023 – 2024
G. H. Raisoni college of engineering and business management, Jalgaon	
CGPA:	8.0 / 10.0
Higher-Secondary Education	2021 – 2023
S.S.V.P.S. Jr. & Sr. College, Sindkheda	
Percentage:	72.50%
Secondary School	2019 - 2021
Suman high school No.5, Surat	
Percentage:	79%
