PROFFESIONAL SUMMARY

Full Stack Developer with a proven record of shipping production-grade applications end-to-end — from architecting Spring Boot REST APIs to deploying React.js frontends on Railway and Vercel. Built a Hospital Management System handling 150+ real appointments with JWT auth, Razorpay payments, and role-based access control across Admin, Doctor, and Patient roles. Engineered 25+ REST APIs across two live platforms using layered Spring Boot architecture and JPA/Hibernate ORM. Pursuing B.Tech in Computer Science (CGPA 7.96) at G.H. Rasoni College, with 100+ DSA problems solved and hands-on experience across the full deployment lifecycle including CI/CD, Docker, and AWS.

TECHNICAL SKILLS

- Languages** : Java, JavaScript, SQL, HTML5, CSS3.
- Backend** : Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, RESTful APIs, Microservices (basic), Swagger/OpenAPI.
- Frontend** : React.js, Redux, Tailwind CSS, Framer motion.
- Database** : MySQL.
- Testing & Tools** : Postman, Maven, Git, GitHub.
- Cloud & Deployment** : Railway, Render, Vercel, Docker, CI/CD, AWS (basic familiarity).
- Concepts** : OOP, Data Structures & Algorithms, System Design, Operating System, Computer Network.

PROJECTS

Hospital Management System - [GITHUB](#) - [LIVE](#)

March 2026– June 2026

(Java, Spring Boot, React.js, Tailwind CSS, Redux Toolkit, MySQL, JWT Authentication, Razor-pay, AWS)

- Architected and deployed a full-stack RESTful Hospital Management System with Role based access control (Admin, Doctor, Patient) using Spring Boot MVC and JWT Authentication, supporting 150+ successful appointment Bookings.
- Engineered 15+ REST APIs using Spring Boot with layered architecture (Controller → Service → DTO → Repository →Entity) and JPA/Hibernate for MySQL ORM, ensuring clean separation of concerns and maintainable codebase.
- Built dynamic React.js frontend with Redux Toolkit for global state management, protected routing, and secure JWT Token handling and reducing unauthorized access attempts by enforcing route-level authentication guards.
- Integrated Razorpay payment gateway for appointment booking with real-time payment status updates.
- Deployed full-stack application on Railway (backend) and Vercel (frontend), configuring environment variables, production build pipeline, and live domain — making the application publicly accessible.
- Implemented doctor availability scheduling module with time-slot management, enabling patients to book, reschedule, and cancel appointments through a responsive Tailwind CSS UI with Framer Motion animations.

E-Commerce Web Application— [GitHub](#)

Sept 2025– Nov 2025

Java, Spring Boot, React.js, Tailwind CSS, Redux Toolkit, Framer-Motion, MySQL, JWT Authentication, Razor-pay, AWS.

- Developed a scalable full-stack E-Commerce platform with Spring Boot MVC backend and React.js frontend, featuring product catalog, cart management, order processing, and Razorpay payment integration handling 100+ Product Listings.
- Engineered 10+ RESTful APIs using Spring Boot with layered architecture (Controller→Service→DTO→Repository→Entity) and JPA/Hibernate ORM for MySQL, supporting complete product and user CRUD operations.
- Implemented JWT-based authentication with role-based access control (Admin/User), securing protected routes and ensuring only authorized users access admin dashboard and order management features.
- Built responsive React.js frontend with Redux Toolkit for global cart and auth state management, reusable component library, and Framer Motion animations — achieving smooth UX across mobile and desktop viewports

CERTIFICATIONS

- Full Stack Java Developer –[view](#)** Aug - 2025
Brilliance Foundation
